### **Inflatable Packers for the Water Well and Borehole Developments and Maintenance**

**By: Replacement Inflatable Packers and Elements, John Misson**

Replacement Inflatable Packers and Elements manufacture inflatable packers for the water well, borehole development and maintenance, including high pressure inflatable packers for hydro fracturing and block caving procedures.

Replacement Inflatable Packers and Elements manufacture inflatable packers and associated equipment for diverse applications such as oil and gas exploration, construction, environmental investigations and mine de-watering and de-gassing operations.

Have a question for Replacement Inflatable Packers and Elements?  
Visit our website.

Replacement Inflatable Packers and Elements have developed a broad range of inflatable packers and associated equipment expressly designed for water well development, water well maintenance and decommissioning.

Replacement Inflatable Packers can provide standard and purpose built inflatable packers to meet the needs of any water well and borehole developer, while complying with relevant statutory requirements.

Water well maintenance procedures carried out by Replacement Inflatable Packers and Elements may involve complete or partial well relining, case patching, hydro fracturing and abandonment products for unproductive/ unserviceable wells and bores.

The product line developed by Replacement Inflatable Packers and Elements to undertake water well development and maintenance includes float shoes, inflatable swage packers, inflatable grouting packers, bridge plugs, Inflatable grab packers, high pressure inflatable packers for hydrofracturing procedures and abandonment decommissioning packers and plugs.

Contact Replacement Inflatable Packers and Elements, “The Inflatable Packer Innovators” for all your inflatable packer requirements.
